

## Your perfect Highlight

### tesa Softprint® X-Soft series

Print extra fine – extra quick, extra safe

Today's plate making equipment allows the reproduction of finest screens and highlights on photo polymer plates. This opens up opportunities for printers who can harness this potential on the press. With tesa Softprint® X-Soft series the printing of smallest dots and smooth vignettes has never been easier.

tesa Softprint® X-Soft –  
print finest screens  
consistently  
throughout the job

### Make ready

Be fast and save waste! With its wide impression window tesa Softprint® X-Soft series is the ideal partner for printing plates with high screen counts and fine line work. Optimal pressure settings can be set quickly due to super soft foam tolerance of pressure changes, resulting in minimum dot gain over a big range of impression.

### Free yourself

Speed up the press! tesa Softprint® X-Soft series protects the plate from distortion factors to give the perfect print result. The absorption is so effective that even bouncing stripes resulting from press vibrations at high speeds are not an issue. Due to its optimized elasticity there is no need to readjust impression settings with changes in speed.

### Be consistent

Excellent results from the first to the last copy! The high quality closed cell foam structure ensures consistent results over long print runs. tesa Softprint® X-Soft series delivers finest dots and smooth vignettes, with the latest screening technologies even down to zero, copy for copy.

## Technical Details

Product	Category	Thickness	Backing	Adhesive	Liner
tesa® 52118	380 µm 15 mil	430 µm 17 mil	– PE foam – Closed cell – Yellow ID logo	– Acrylic	– PP filmic – White – Embossed
tesa® 52018					

## Application Area

Product	Print Motif	Adhesive Properties
tesa® 52118		 <p>Easy mounting, demounting and repositioning properties of foam and plate. Optimized for the use of thin plates and short runs with quick change over.</p>
tesa® 52018		 <p>Easy mounting and demounting of foam. Stronger plate bond for secure hold down, even on minimal diameter sleeves or cylinders.</p>

## Further Information

For more information about the high quality tesa® assortment for narrow web printers please refer to the following brochure or contact your local tesa sales representative.
